FOR IMMEDIATE RELEASE

Agile Milcoms to Demonstrate New *ISR*-Direct™ Delivery Platform for Full Motion Video and Data to Mobile Devices at Milcom 2012
Cost-Effective ISR solutions to the Warfighter

October 26, 2012 – Milcom 2012 – Orlando, Florida: Today, Agile Milcoms, an ACS company providing Satcom Digital Media and ISR systems to federal, military, intelligence and security agencies, will demonstrate their new *ISR*-Direct™ platform that delivers FMV (Full Motion Video) and data directly to the Warfighter via handheld tablets and smartphones. This new platform incorporates key Agile Milcom components as well as Haivision's Makito Air encoder and Kraken Transcoder. *ISR*-Direct will be demonstrated at MILCOM 2012 (Booth #430).

The ability to supply accurate and timely ISR (Intelligence, Surveillance & Reconnaissance) information is essential in today's combat environment. *ISR*-Direct provides real-time video as provided from a multitude of the end-user sensors combined with map overlay and two-way data to the critical edge, allowing Warfighters to have up-to-date ISR information during their mission.

Agile Milcoms is experienced in providing communication solutions to Command Centers and the Warfighter-on-the-move. The company has developed the *ISR*-Direct to provide video and data directly to tablet devices in combination with Satcom and wireless networks. This system is compliant with military security requirements and features embedded AES encryption in addition to the end user's HAIPE security measures.

Haivision's Makito Air encoder and Kraken transcoder form an integral part of the Agile Milcoms *ISR*-Direct system. The ruggedized Makito Air encoder is MISB compliant and JITC certified for 1080p HD performance. It is an established military encoder utilized both in Airborne and Ground-Based systems.

About Haivision
Haivision delivers advanced technology for streaming, recording, managing, and distributing secure IP video and interactive media within the enterprise, education, medical/healthcare, and federal/military markets. Haivision is a private company based in Montreal and Chicago, with technical excellence centers in Beaverton, Oregon; Austin, Texas; and Hamburg, Germany. With a global sales and support organization, Haivision distributes its products through value-added resellers, system integrators, distributors, and OEMs worldwide. More information is available at www.haivision.com.

About Agile Milcoms
Agile Milcoms, an ACS company, is a small business valued-added systems integrator specializing in satellite and other communication technologies. The company provides beginning-to-end solutions for Military or Government communications projects. With over 30+ years of systems design and implementation experience, ACS is able to quickly deliver communications systems in the field. Agile Milcoms will design a complete system and integrate all components, install, train, and support, In-theater or domestically. More information is available at www.agilemilcoms.com.
